### PROFILE

Information Systems Analysis and Development with more than six years of experience in Full Stack development. I specialized in ReactJS, Angular, HTML, CSS, JavaScript, Java and C#, and have a strong focus on creating efficient and scalable applications. I have excelled at leading development teams and significantly improving technical debt management in previous projects. I am committed to technical excellence and continuous innovation, so I am looking for opportunities where I can bring my frontend and backend development skills to drive business success.

### WORK EXPERIENCE

#### Senior Frontend Developer

Sumer Labs S.A.S.

March 2022 - July 2024

**Bug Resolution:** Identifying and fixing bugs to ensure smooth and uninterrupted user experiences.

**New Features Development:** Designing and implementing new features to enhance product functionality and user satisfaction.

**Maintenance of Existing Features:** Regularly updating and maintaining existing features to improve performance and compatibility.

**Proposal Analysis:** Analyzing new project proposals to assess feasibility and potential impact.

**Sprint Planning:** Participating in sprint planning sessions to prioritize tasks and manage project timelines effectively.

**Support for Junior Developers:** Assisting junior developers with technical challenges and providing guidance to help them grow professionally.

#### Tech Leader

Chiper S.A.S.

November 2021 - March 2022

As a Technical Lead on the POS project at Chiper, I played a pivotal role in driving the technical direction and execution of the project. My responsibilities included:

**Feature Development:** Took charge of developing complex features, ensuring they met high standards of quality and performance.

**Task Management:** Assisted in managing and dividing tasks among a team of four developers, optimizing workflow and ensuring timely delivery of project milestones.

**Design and Code Review:** Contributed to designing workflows and code architecture, providing constructive feedback and guidance to maintain code quality and consistency.

**Demonstration and Communication:** Conducted bi-weekly demos to team managers, showcasing progress and aligning the project direction with business objectives.

### Senior Frontend Developer

Ditech Group

March 2021 - November 2021

At Ditech, I worked on the Banco Popular project for the real estate sector as a Frontend Developer. My responsibilities included:

**Feature Development:** Developed complex features, ensuring robust functionality and an excellent user experience.

**Architectural Planning:** Carefully planned the architecture with team members, prioritizing scalability and security.

**Design System Development:** Created the design system from scratch to ensure a consistent and cohesive user interface.

**Code Review:** Conducted thorough code reviews to maintain high code quality and performance standards.

### Mid-level Frontend Developer

Rappi S.A.S.

December 2018 - March 2021

At Rappi, I was involved in several key projects, each with distinct responsibilities:

**Rappi Web:** I resolved bugs, developed new features, and implemented a real-time courier tracking map.

**Rappi Travel:** I planned the new project from scratch, designed the architecture, and developed the MVP along with all its features, transforming it into a productive application.

**Rappi Betting:** Successfully developed the MVP for a new betting project.

**Rappi Events:** Created a streaming project from the ground up, enabling virtual event ticket purchases. I contributed to the development of the checkout system and live streaming functionality.

Through these projects, I demonstrated my ability to handle diverse and complex tasks, from bug resolution and feature development to project planning and MVP execution.

### Full Stack Developer

Imaginamos

March 2018 - December 2018

At Imaginamos, I worked as a Full Stack Developer on a project called Merck, a platform designed for managing pets, their care, and vaccinations. My responsibilities included:

**Project Initiation:** Started the Merck project from scratch, shaping its vision and technical foundation.

**Backend Development:** Developed the backend, including the database, ensuring it met the business logic requirements.

**Frontend Development:** Designed and implemented the frontend, adhering to the UI and UX best practices requested.

**MVP Execution:** Successfully developed the MVP (Minimum Viable Product), ensuring it was ready for production.

**Production Launch:** Launched the MVP into production, achieving a complete and functional platform for users.

Through this project, I demonstrated my ability to deliver a full-fledged platform from initial concept to production, incorporating comprehensive backend and frontend development.
